Day 1 Craft- Days of Creation Board Game

1. Use the cardstock template or your own design to create your “game board.” Glue pieces of different colored paper all along the “path.” Try to use the same amount of each color.
2. Choose 7 different spaces along your board (at least one of each color) and label them- Day 1, Day 2, Day 3, Day 4, Day 5, Day 6, Day 7.
3. Cut out the dark circle (before creation) and the world (you can color the blank one yourself if you want) and tape or glue them to the start and finish.
4. Decorate your game with pictures or stickers representing Creation (sun, stars, moon, ocean, animals, birds, humans...)
5. To play the game, find a playing piece (a penny, lego, small toy, etc) for each player. The youngest player goes first. Roll the colored dot die and move to the first space with that color.
6. If you land on a space that has a “Day” on it, then state what happened on that Day of Creation. If you are correct then move forward two spaces. If you are incorrect, then move back two spaces.
7. The player to get to the “World” wins the game!
